

Small and Medium Enterprises (SME) Business Offering

"Every second lost gives attackers more opportunity to steal sensitive data or disrupt critical business operations"

WHO WE ARE

CYBEAR delivers worry-free IT and compliance support, so you can focus on growing your business with confidence. Our certified experts handle your security and regulatory requirements end to end, giving you genuine peace of mind and the freedom to scale without fear.

OUR SERVICES

Security Assessments

Comprehensive security audit to uncover where weaknesses and security gaps exist throughout your organization

Risk and Compliance

Aligning your GRC activities to business performance drivers, using our security consulting services and frameworks

Incident Response

When security threats arise, quick incident response is critical for proper identification and containment of the risk

Penetration Testing

The best way to know if your organization is susceptible to a security breach is to test your defenses and harden your systems

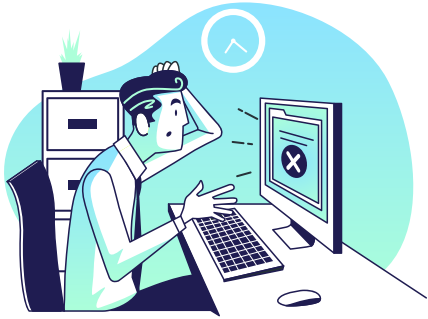

Security Awareness

Reveal your employees' strengths and weaknesses, and empower them against cybercriminals

Managed Service Provider

Helping your business with your most common tech support needs (Help Desk) and strategic planning, ultimately impacting the bottom line

PROBLEM VS SOLUTION

Problem

There is a hacker attacking individuals and/or organizations every 39 seconds, on average 2.224 times a day. In 2024, there was a total of 3,202 breaches reported

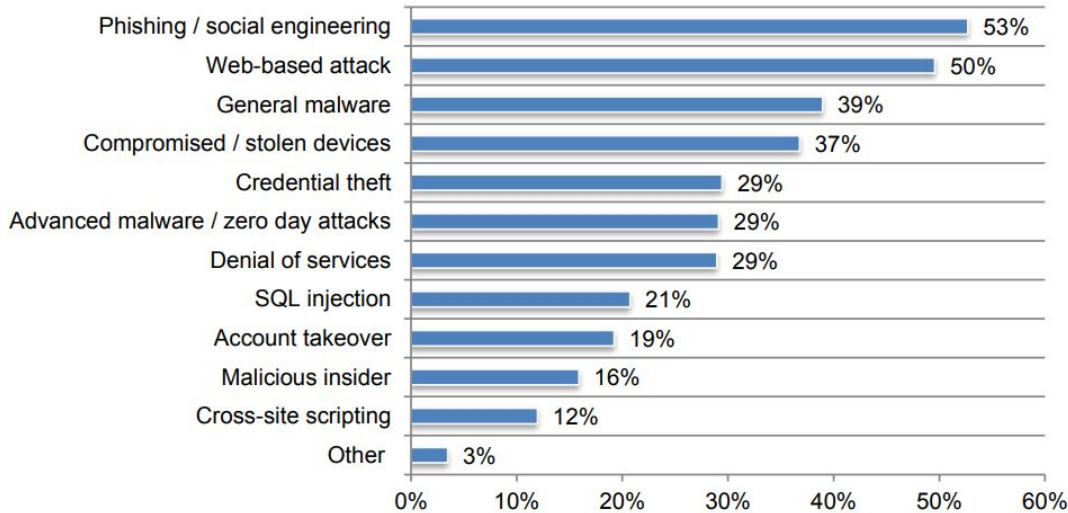

Solution

From a financial standpoint, small and medium-size businesses working with an MSP will be less costly than a salaried full-time dedicated IT professional most of the time

DATA BREACHES IMPACT

Top Types of Attacks Businesses Experienced

\$4.88 MM

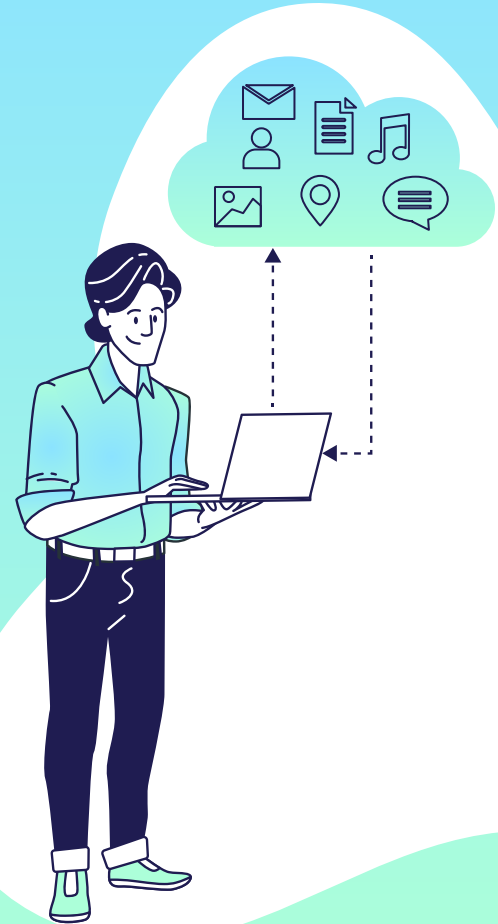

Average cost of a data breach

According to Accenture's Cost of Cybercrime Study, 43% of all cyberattacks are aimed at small businesses, but only 14% of these organizations are prepared to defend themselves.

Ponemon Institute's State of Cybersecurity Report found that 66% of small and medium-sized businesses have experienced a cyberattack in the past 12 months.

HOW CAN WE HELP?

SUPPORT AND MANAGEMENT (MSP)

Real Time Alerts

RAM usage, hard drive, CPU load, AV, customized event viewer alerts plus much more

IT Automation

Pre-configured maintenance and administrative tasks which can be applied to your servers and workstations

Patch Management

Identify and automate software update patches, ensuring your devices are always up to date

Network Discovery

Network scans and discover new devices, aging servers, HDD/SSD upgrades and more

- Advanced Internal Audit & Compliance Reporting (HIPAA/PCI DSS/ISO 27001/NIST CSF)

WE ARE HERE TO HELP

Audit Readiness

We manage the process and focus on fulfilling extensive and complex auditor requests

Technology Policies

We will help you create and manage policies that support best practices

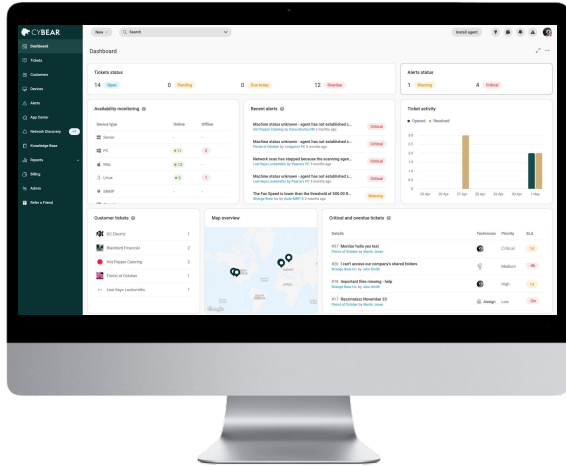

Compliance with Standards

We provide software and support materials that are compliant with regulations tailored to you

TO KEEP YOU RUNNING

Asset Lifecycle Tracking

We track hardware/software procurement, warranty, replacements and automate upgrades

Backup Monitoring

We monitor backups 24/7 and auto-fix failures instantly

Endpoint Security

We ingest antivirus, EDR, firewall alerts and auto-trigger containment to neutralize threats

PROTECTED & RESILIENT

TLS/SSL Certificate

We configure and renew SSL/TLS certificates so your site uses HTTPS, protecting visitor data

Bot Protection

We block malicious bots and scrapers (including AI-driven), preserving resource integrity

DDoS Protection

We defend against unlimited HTTP/HTTPS DDoS attacks, absorbing and mitigating malicious traffic before it ever reaches your server

IP-Based Rate Limiting

We throttle abusive IPs generating high request volumes (e.g. login attacks), giving you precise control over spikes

GOVERNANCE, RISK & COMPLIANCE

RESILIENCE METRICS

Audit Checklist

1. Personnel Security
2. Physical Security
3. Account and Password Management
4. Confidentiality of Sensitive Data
5. Disaster Recovery
6. Security Awareness and Education
7. Compliance and Audit

Assessments

1. Human Threats
2. General Threats
3. Identification Authorization Threats
4. Privacy Threats
5. Access Control Threats
6. Repudiation Threats
7. Legal Threats
8. Reliability of Service Threats

APPROACH & METHODOLOGY

Information Gathering

Publicly Available Information, Applications Enumeration, Entry Points

Manual Testing

Identity Management Testing, Data Validation, Account Lockout

Remediation Testing

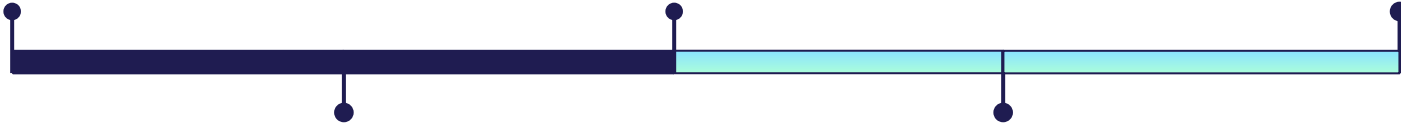

Cross Site Scripting, Web Tampering, Command Injection

Discovery

Testing Role Definitions, Vulnerability Scanning, Input Validation

Reporting & Mitigation

Root Cause Analysis, Remediation Plan, Session Hijacking, Session ID
